

# Vet Series Monthly Flea, Intestinal & Heartworm Treatment

for dogs 4 - 10 kg

## Label

For:

- the treatment and prevention of fleas (*Ctenocephalides* spp). Reduces the incidence of Flea Allergy Dermatitis. Larval flea stages are killed in the surroundings of EXELPET™ Vet Series™ Monthly Flea, Intestinal & Heartworm Treatment treated pets;
- the prevention of heartworm (*Dirofilaria immitis*) infection;

For the treatment and control of:

- Roundworm (*Toxocara canis*, *Toxascaris leonina*) kills larval (L4), immature and adult worms.
- Hookworm (*Ancylostoma caninum*, *Ancylostoma braziliense* [this hookworm is usually restricted to tropical areas in Australia], *Ancylostoma ceylanicum*, *Uncinaria stenocephala*), kills larval (L4), immature and adult worms of all species.
- Whipworm (*Trichuris vulpis*);
- Generalised demodicosis (*Demodex canis*);
- Sarcoptic mange (*Sarcoptes scabiei*);
- Ear mites (*Otodectes cynotis*);
- Lice (*Trichodectes canis*, *Linognathus setosus*) for up to 6 weeks; in dogs.

One application lasts for a month. Water resistant formulation

**DIRECTIONS FOR USE:**  
Contraindications: DO NOT apply to cats.

**Precaution:**  
Use with caution in sick, debilitated or underweight animals. This product may be safely applied to heartworm infected dogs. However a diagnostic test for heartworm prior to commencement of treatment is recommended to ensure the optimum health of dogs. The liquid vehicle in this product may discolour or damage certain surfaces and fabrics e.g polished floorboards, leather etc. Exclude the animal from contact with such surfaces until the product dries on the animal's coat.

**Side Effects:** Occasionally hair loss may occur at the application site. This is usually a single occurrence and hair will grow back uneventfully.

## Instructions

**Dosage and Administration:**  
For external use only  
Do not give product by mouth  
One tube treats dogs 4-10kg bodyweight

**Application:**  
Hold tube upright and pull off the cap. Reverse the cap and push cap back on tube. Twist cap to break seal, then remove cap from tube. Apply between the shoulder blades. The animal should be standing for easy application. Remove any collar prior to application and replace when product is dry. Part the hair until the skin is visible. Place the tip of the tube on the skin and squeeze the tube firmly twice to apply the solution directly on the skin. Avoid pet's eyes or mouth.

Repeat monthly or as directed.

This product remains efficacious following shampoo treatment, swimming or exposure to rain. If washing animal during use of this product use a soap free shampoo.

Treatment for heartworm should occur regularly at monthly intervals.

### FLEA CONTROL AND PREVENTION:

Treatment of pets with this product rapidly kills fleas and reduces the incidence of flea allergy dermatitis (FAD). This product may be used as the only product for flea control as it breaks the life cycle and kills fleas emerging from the environment. More rapid resolution of heavy environmental infestations may be obtained by additional environmental control measures using a suitable registered product.

**HEARTWORM PREVENTION** Treatment with this product should start one month before the first exposure to mosquitoes and must be applied at one monthly intervals to maintain continuous year-round protection. When replacing another heartworm preventive product, the first treatment with this product must be given within one month of the last dose of the previous product.

**WORM CONTROL** This product treats and controls the major gastrointestinal nematodes of dogs but does not control tapeworms. In order to control tapeworms use EXELPET™ EZY-DOSE™ Intestinal All-Wormer Chews for Dogs. If worm problems persist, consult a veterinarian.

**TREATMENT AND CONTROL OF GENERALISED DEMODICOSIS** This product has been shown to be highly effective in the treatment of generalised demodicosis when administered at monthly intervals for 2 to 4 treatments.

**TREATMENT AND CONTROL OF SARCOPTIC MANGE** This product has been shown to eliminate 100% of sarcoptic mites (*Sarcoptes scabiei*) after a single dose. A second dose a month later will result in continued improvement of the clinical signs associated with sarcoptic mange. Monthly application will control any subsequent sarcoptic mite infestation.

**TREATMENT AND CONTROL OF EAR MITES** For the treatment of ear mites (*Otodectes cynotis*), this product is highly efficacious as a single dose. Monthly application will control any subsequent ear mite infestation. To maximize efficacy thorough cleaning of the ear canal is recommended with a product that is registered for that purpose or as directed by a veterinarian.

**PUPPIES** may be treated with this product from 7 weeks of age. For control of roundworms and hookworms puppies require worming at 2, 4, and 8 weeks of age. When worming puppies prior to commencing use a specific worming agent such as EXELPET™ EZY-DOSE™ Intestinal All-Wormer Chews for Dogs. Once treatment with this product is commenced every month, worms will be continuously controlled.

**PREGNANCY AND LACTATION** No primary embryo-toxic, teratogenic or reproductive toxic effects have been observed with imidacloprid or moxidectin in laboratory species. Evidence suggests that no adverse effects are to be expected in pregnant and lactating dogs. However, the safety of this product has not been established during pregnancy and lactation.

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

### SAFETY DIRECTIONS:

Harmful if swallowed. Will damage the eyes. Repeated exposure may cause allergic disorders. Avoid contact with the eyes. If product in eyes, wash it out immediately with water. Wash hands after use.

**FIRST AID:** If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

**DISPOSAL:** Dispose of used applicators by wrapping in paper and placing in garbage.  
**STORAGE:** Store 25°C (Air conditioning).
